

FOR IMMEDIATE RELEASE

**SANY SHOWS ITS SUPPORT FOR MCCARTHY HEAVY EQUIPMENT
WITH VISIT FROM FOUNDER**

Two years ago McCarthy Heavy Equipment aligned itself with global earthmoving equipment manufacturer, Sany. The interim period has been an exciting time for both companies, with new product lines increasing market penetration and credibility.

In a show of support for McCarthy Heavy Equipment, Sany's founder and chairman of the Board, Liang Wengen visited McCarthy Heavy Equipment's facilities in May. He was accompanied by Xiang Wenbo, chief executive for Sany Heavy Industry and Group deputy president; Huang Jianlong , chief executive for Sany International and Group deputy president; Zhang Hongbo, managing director of Sany Southern Africa and Xiao Jiang, sales manager for Sany Southern Africa.

Wengen has received numerous titles including CCTV Economic Annual Figure, Best Employer of Chinese Listed Companies by the Forbes, World Executive Award for Achievement in Business and Economy and 'Best Entrepreneur' award for 'Top 10 Entrepreneurs for 2008'.

Founded in 1989, the Sany Group engages mainly in manufacturing construction machinery with a product range covering concrete machinery, road machinery, excavating machinery, piling machinery, hoisting machinery, port machinery and coal mining machinery.

In the Chinese market, the concrete machinery, piling machinery and crawler cranes are regarded as top brands. Sany's products have been exported to more than 110 countries and regions to work on various key construction projects around the world. Each year, 5% of the total sales revenue is reinvested in research and development.

During a tree planting ceremony at McCarthy Heavy Equipment's Boksburg facilities which was attended by Brand Pretorius, ceo of McCarthy Ltd, Wengen commented that the tree was symbolic of the cooperation between the two companies and represents the intention for a long term relationship that will grow and mature with time. "Like our partnership, it will offer shade and protection while enduring different seasons," Wengen says.

Sany has a sales network which covers more than 100 countries with over 100 dealers and 15 overseas subsidiaries. "We aim to be in the top five suppliers of earthmoving equipment globally and we have already set a number of records including the first large tonnage hydraulic rotary drilling rig in Asia; the massive 'Crane King of Asia' (SCC 1000) and the biggest 200 ton excavator in Asia," Wengen says.

Dylan Chicken, managing director of McCarthy Heavy Equipment, concludes that the choice of a partnership with a globally represented company with the stature of Sany has been highly beneficial and will take McCarthy Heavy Equipment confidently into the future.
