

MINERAL ENGINEERING TECHNICAL SERVICES PTY LTD

FOR IMMEDIATE RELEASE

Mineral Engineering Technical Services (METS) Names Peter Steckis as Consulting Metallurgist

Perth based Metallurgical Engineering Consultants, METS, is pleased to announce the appointment of Peter Steckis in the position of Consulting Metallurgist. Peter has a Bachelor of Applied Science (Extractive Metallurgy) from the Western Australian School of Mines and has 38 years experience in the mining industry. Peter is an asset to any project, having managed different process plants and mining operations. During his time as a process manager at various operations, Peter initiated many improvements which contributed to plant efficiencies.

Peter was heavily involved in a Feasibility Study while at the Gidgee Gold Mine; which involved a trial mining and processing phase, laboratory test work, and contract tendering. He has gained significant expertise in gold, nickel, iron ore, uranium, management, review and supervision and process plant operations. METS looks forward to the positive contribution Peter will bring to their client's projects

By investing in experienced and well equipped staff METS has demonstrated their commitment to providing professional people and services to their customers and the ability to make a positive difference to their customers business. METS has shown that they are well connected in the mining industry, maintaining key relationships, leading technology and setting trends.
