Ludman Industries Hosts Team of Russian Engineers

Uralelecromed is Russia's largest copper smelting company

January 8, 2013, Milwaukee, WI — Ludman Industries producer of **custom engineered Compactors and Briquetters** hosted a team of engineers from Russia's largest Copper Smelting Company, Uralelectromed. The engineers were here to inspect and witness the assembly of the briquetter and roll assembly removal system.

Uralelectromed is to take delivery of the model #4034 briquetter in January 2013. The Ludman Industries custom built, high performance model # 4034 Briquetting machine is capable of producing 50 metric tons / hour of copper sulfide briquettes to be used in the copper smelting process.

"Each Ludman Briquetter and/or Compactor is custom engineered to meet the various demands of each individual client," says James Lenahan, CEO of Ludman Industries. "The engineering team from Uralelectromed visited to witness assembly of their model #4034 Briquetting machine."

"The Russian engineers commented that they were extremely impressed with the operations of our Milwaukee facility," says Alan Severns, Vice President of sales. "They were especially impressed with our engineers and assembly teams' ability to seamlessly manufacture and assemble all the intricate parts of such an impressive machine."

"The expansion of the Ludman Industries distribution to Russian sets Ludman Industries as one of the world's largest international supplier of custom designed and built compactors and briquetters," commented James Lenahan. "We look forward to a long and prosperous relationship with Uralelectromed."

Ludman Industries (formerly known as Ludman Machine Company), at 4810 North 124th Street, Milwaukee, Wisconsin, founded in 1968, is a global manufacturer of Compactors, Briquetters, Granulators and Flaking & Shredding Mills. Providing complete agglomeration process solutions from testing, design and production through distribution to customer support. Forging innovation, building quality, Ludman Industries is a world leader in the mining, wastewater treatment, farming, chemical and food industries.
