Schneider Electric integrates the top 10 of the 2014 Global 100 Most Sustainable Corporations in the World

- Schneider Electric's sustainable development strategy is recognized for the third consecutive year
- The Group won the 1st place of the industry and capital goods sector

Rueil-Malmaison (France), January 22, 2014 – Schneider Electric has been awarded, for the third consecutive year, by the Corporate Knights world ranking as one of the 100 most advanced company in the field of sustainable development. The 2014 ranking was unveiled at the Davos World Economic Forum (Switzerland). Schneider Electric ranked 10th in the list and is positioned at the head of companies in the industry and capital goods sector.

The *Global 100 Most Sustainable Corporations in the World*, ranking by Corporate Knights, the Canadian magazine for clean capitalism, consists of the top 100 performing stocks worldwide, based on a range of sector-specific sustainability metrics. Data for the project are primarily collected from Bloomberg and through direct engagement with the 350 companies that made the project's shortlist, selected amongst the largest global cap stocks.

"Schneider Electric progresses again in the Global 100 Most Sustainable Corporations ranking, said Jean-Pascal Tricoire, Chairman and CEO, Schneider Electric. Integrating the top 10 ranking this year and emerging as the leader in our industry is a strong incentive and encouragement to increase our engagement in sustainability."

Since 2005, Schneider Electric measures and publishes the key progress on a quarterly basis through its sustainability dashboard, the Planet & Society Barometer. It consists in 14 indicators across three key areas of the Group sustainability development strategy: economy, environment and society. This tool allows Schneider Electric to evaluate and assess on a regular basis its actions for sustainable development and share results with all its stakeholders.

Furthermore, Schneider Electric has an active ranking strategy in the main sustainability indices such as CDP¹ and DJSI² or the annual ranking of Corporate Knights.

About Schneider Electric

As a global specialist in energy management with operations in more than 100 countries, Schneider Electric offers integrated solutions across multiple market segments, including leadership positions in Utilities & Infrastructure, Industries & Machines Manufacturers, Non-residential Building, Data Centres & Networks and in Residential. Focused on making energy safe, reliable, efficient, productive and green, the Group's 140,000 plus employees achieved sales of 24 billion euros in 2012, through an active commitment to help individuals and organizations make the most of their energy.
