

Soventix has commenced solar PV plant at Coca Cola

Press Release
3 July 2014

Soventix South Africa (Pty) Ltd, the subsidiary of Soventix GmbH, has commenced the installation of a solar PV plant for Western Cape's Coca Cola bottling plant, Peninsula Beverages.

The plant is currently being installed on the forklift charging station, which will provide the required power for the forklifts from a renewable energy source.

This installation will form what should be any company's strategy ie. reducing carbon emissions as well as saving on their electricity costs.

Soventix South Africa GM, Rowan Jacklin said that the decision taken for such a project was definitely a step in the right direction in terms of a reduced carbon economy and levelising the cost of electricity over the next 30 – 40 years.

Soventix South Africa, is currently working in many sectors within sub-Saharan Africa and offer EPC, Project Development and innovative power purchase agreement solutions to their clients.
