1st Sept 2015

For immediate release

A touch of Glass from ASSA ABLOY Entrance Systems

ASSA ABLOY Entrance Systems extends its comprehensive entrance solutions portfolio with the introduction of a new range of attractive all glass revolving doors.

Revolving doors are a practical, safe and environmentally friendly solution and ensure secure, convenient and safe pedestrian flow as well as climate control. The Besam all glass RD3T and RD4T revolving doors, complete with LED-glass ceiling, are certainly no exception. These doors combine aesthetics, e-functionality and energy efficiency to provide the ideal solution to complement any building entrance.

Due to their environmentally friendly design, revolving doors seal the entrance and prevent internal warm or cold air from escaping and stop the infiltration of unwanted external air. This helps to maintain the indoor climate and leads to a significant reduction in energy consumption.

Suitable for internal and external entrances, as single installations or for multiple main entrances, the all glass revolving doors feature the latest-generation drive unit. In combination with the full range of monitored sensors which are standard fittings in the doors, the doors revolve smoothly and efficiently to provide seamless entry and exit.

The all glass revolving doors can also be operated remotely using the latest state-of-the-art concealed control unit and Advanced Mode Selector (AMS) operator panel. The panel's sleek, graphical touch screen provides a user-friendly overview of the door's configuration which includes usage statistics, service status as well as perform diagnostic functions.

Additional features of the Besam all glass RD3T and RD4T revolving doors include:

- Night closing doors
- Push button for the disabled
- Emergency stop

ASSA ABLOY Entrance Systems is a market leader in the supply and installation of world-class entrance solutions and the new all glass revolving door range complements the company's product portfolio of sliding and swing doors as well as air curtains. ASSA ABLOY Entrance Systems supports customers in South Africa as well as cross border with exemplary after-sales service that includes a team of trained, highly skilled and experienced technicians, parts supply and maintenance programs.
