

ELB Press Release

**ELB and Givaudan sign Concept and Definition Phase Study for Givaudan Tulisa Park Project**

Formatted: No underline

ELB Engineering Services is pleased to announce that a contract has been entered into between Givaudan SA, part of the Givaudan Group from Vernier, Switzerland and ELB Engineering Services (PTY) Ltd (ELB).

Givaudan is an industry leader, with 25% of the global market share and operates in all regions of the world. With over 80 locations worldwide and more than 30 production sites, working in close partnership with their customers, locally, regionally and globally. A company whose historical roots date back to the beginnings of the modern flavour and fragrance industry in the late eighteenth century, Givaudan is one of the leading creators of fragrances and flavours in the world.

Givaudan is considering the development of a new flavourant factory in South Africa. ELB will be responsible for the plant design which includes the utilities and buildings. The project will be implemented in the following phases; phase 1a is for project setup and development of 2 concept processes, while phase 1b is for the design of the buildings and utilities. Phase 2 is for the execution of the works (EPC).

Process design will be conducted by GEA, an internationally recognised supplier of process equipment and know-how in this field.

We look forward to an exciting, mutually beneficial, long lasting alliance with Givaudan.

ELB Engineering Services is an internationally recognised, technology driven, holistic solutions provider to the mining, power, port, construction and industrial sectors. This is achieved through ELB generated innovation, supply of equipment and technology from our world class partners, in-house developed expertise and integration of the services and products from the ELB Group of companies.
