

## **RS Components adds over 800 new lines to its industrial fasteners, fixings and ironmongery range**

***Massive selection of high-quality screws, bolts and more makes RS the place to go to for wide-ranging OEM, maintenance and construction needs***

**04 March 2016, Johannesburg, South Africa** - [RS Components](#) (RS), the trading brand of [Electrocomponents plc](#) (LSE:ECM), the global distributor for engineers, has added over 800 new lines to its [RS Pro range](#) of high-quality fasteners, fixings and ironmongery, giving engineers a choice of nearly 9000 products for general and high-performance applications in mechanical engineering and construction industries.

The new introductions extend the range of [RS Pro zinc-plated](#) and [stainless steel machine screws](#) to address almost every industrial context, from general machine building, maintenance and repair and installation to specialist applications such as marine equipment manufacturing. A wide range of sizes and head types are available, in a choice of economical [zinc-plated steel](#) or 304 and 316 stainless steel for applications that require higher corrosion resistance.

In addition, RS has further expanded its range of steel and stainless steel socket screws to offer one of the broadest selections of any supplier. The screws are suitable for virtually any indoor or outdoor applications that require high reliability, durability and ruggedness.

By also boosting its selection of masonry fixings, including hook and eye bolts, sleeve anchors and through bolts in high-grade materials and a wide range of sizes, RS has strengthened its offer for the construction sector.

In addition to its [RS Pro range](#), RS offers industrial fasteners and fixings from many recognised brands including Fischer Fixings, Rawlplug, Heico, Holo-Krome, JCS Hi-Torque, and Jubilee.
