

FOR IMMEDIATE RELEASE

**Hapman Partners With Eunori Limited As The Official
Manufacturer's Rep Agency For China**

KALAMAZOO, MICH. – Hapman, a global manufacturer of conveyors and bulk material handling equipment serving industries ranging from chemical, and food, to nutraceutical, minerals processing, wastewater, and power generation has partnered with Eunori Limited located Beijing, China to exclusively handle and support all in-country sales of equipment manufactured by Hapman. For more than 70 years' Hapman has delivered quality, custom-built equipment for bulk material handling. The company headquarters and 114,000 sq ft manufacturing plant is located in Kalamazoo, Michigan, USA. The company also manufactures equipment in a 60,000 sq ft plant in Opole, Poland under its European operations. Hapman designs and builds Pneumatic Vacuum Conveyors, Tubular Drag Chain Conveyors, En-Masse Drag Chain Conveyors, Bulk Bag Unloaders, the Helix® Flexible Screw Conveyor, PosiPortion™ Screw feeders, Dust Collectors, the LumpMaster® Lump Breaker, and more. The equipment can be purchased individually to integrate in an existing process or Hapman will engineer complete material handling systems with controls for a fully-automated bulk material handling system. Both individual units and full-scale systems are designed around the specific needs of small, medium, and large processors.

“Our partnership with Eunori is strong, we selected their company to represent Hapman and our equipment because of their high-level technical skills, ability to help customers solve material handling challenges, and because the company has a positive reputation in China”, states Greg Patterson, Hapman Vice President.

Don Ding, Vice General Manager of Eunori describes his company in this way, “Eunori is an engineering company which supplies the customer tailored equipment and systems to the specific requirements of the application. Our company has been in business for more than 10 years serving industries such as water treatment, chemicals, food and pharmaceutical. Eunori has a team of stable and experienced engineers with a very high-level of application knowledge. This knowledge and experience is what ensures Eunori
