

FOR IMMEDIATE RELEASE

New division, new products, larger presence at CONEXPO 2017 See what's next for McCloskey International

New division, equipment and features to be highlighted

PETERBOROUGH, ON – January 6, 2016 – Screening and crushing industry leader McCloskey International will clearly demonstrate its continued growth with a significant increase in its presence at CONEXPO/CON-AGG 2017 in Las Vegas, Nevada.

Located in the Silver Lot at Stands S5014 and S5115, the 20,000+ sq.ft. (1858m²) space will showcase the newest products from McCloskey International, as well as serve as a launch point for the new division – McCloskey Washing Systems.

The 3200 sq.ft. hospitality and information pavilion will provide a venue for customers to meet and mingle with dealers from around the world.

A 50% increase in floor space over 2014 will allow McCloskey to showcase new products alongside the new wash plant, including stackers, screeners and crushers.

THERE'S A STORM BREWING

CONEXPO will see the unveiling of the first Sandstorm washplant. The new MWS products on display at Silver Lot S5115 will represent McCloskey's growing diverse range of materials and mineral washing products. The new product line- up features the much anticipated Modular Wash Plant, Sandstorm™. This modular chassis-mounted scalping unit brings operators a well-proven cost-effective and durable machine in a modular all-electric format, ideal for C&D recycling applications.

“The new product launches are evidence to our ongoing commitment to providing reliable high quality and highly productive equipment that allows customers to meet today’s stringent specifications for cleaner material,” said Sean Loughran, Director, McCloskey Washing Systems. “We are thrilled about unveiling our modular wash plant range at CONEXPO. Our engineers have been working on finalising design and specification of Sandstorm and it’s ready to be launched onto the world stage. “

McCloskey Washing Systems will have a team of technical engineers on-site during the show.
NEW SDX-130 TELECOPING STACKER - STACKING UP WELL

Also on display will be the new SDX-130 telescoping stacker. The SDX-130 desegregates and maximizes stockpile capacity using a robust, fully automated and highly flexible CAN based control system to providing optimal control of material quality. It is capable of 700TPH in applications like aggregates.

NEW R155 FEATURE – EXTENDED HOPPER

McCloskey International will introduce a new R155 model to its lineup of industry leading screening equipment, aiming to provide maximum load flexibility and capacity to its customers. Designed to accommodate a larger variety of loaders, the R155 is able to work in a variety of sites around the world. The R155 will be displayed feeding into the popular J50V2 jaw crusher.

THE GREEN TEAM – YOU ARE READY

McCloskey International will also be actively recruiting at CONEXPO/CON-AGG 2017 to meet the demands of its rapid expansion worldwide. Positions available will range from technical to sales, engineering to production. A campaign supporting the drive for talented and experienced candidates wishing to establish their own business “You Are Ready” will also be featured at the show.

-30-

McCloskey International leads the screening and crushing industry with a complete line of equipment including crushers, screeners, stackers, and washing systems. The products are used in a wide range of applications.

industries which include aggregates, landscaping, infrastructure and road building, construction and demolition, mining, waste management and recycling.

Since 1985 McCloskey International has established a worldwide reputation for high performance products that have introduced many of today's key mobile screening and crushing innovations. Built with power and durability as standard, every product is field-tested before being deployed through a global network of dealers into customer sites around the world.

McCloskey Washing Systems (MWS) is a new business division focused on washing and classifying across multiple applications. The new unit will design and manufacture a full range of mobile, modular and static material and mineral washing equipment.
