

To deliver on Africa's economic growth goals, power supplies must be stable, sustainable and available across the continent.

New top of mind issues include sustainability, finding new revenue streams, risk management, asset management and the place for nuclear in the energy mix. Enclosed is a press release, which we hope you will consider.

Dr. Willem De Beer, Chairman of the POWER-GEN & DistribuTECH Africa Advisory Board is also available for interviews to elaborate on issues including, the impact of renewable energy on traditional utilities, the changing focus on asset management in the power sector and highlights of the upcoming POWER-GEN & DistribuTECH Africa 2017 conference and exhibition, to be staged in Sandton from 18 – 20 July.

Should you be interested in interviewing Dr. Willem De Beer, please contact Leigh Angelo at ITP Communications at Tel: (011) 869 9153 or email: leigh@tradeprojects.co.za

Should you have any queries, or require additional information in the interim, please don't hesitate to contact us.
