## **KZN Industrial Show 2017, Durban ICC, 26 – 29 July, Stand D01, D14 & E19, Hall 1**

### **Parker Hannifin to showcase motion and control solutions for the industrial industry at KZN Industrial Show 2017**

**July 2017** - Parker Hannifin, the global leader in motion and control technologies, have three distributors exhibiting at this year's KZN Industrial Show in Durban, South Africa from 26 – 29 July 2017. The stands to visit are Compressed Air Driers & Filters, Fluid Power Automation and EP Normand, also known as ATI Systems. Visitors to the Parker distributor stands will have the opportunity to see a wide range of components and solutions from multiple technologies on offer to the industrial industry and discuss their applications with the company's experts.

With its broad and innovative product range, Parker is able to satisfy a wide variety of customer requirements for motion and control systems and applications in the industrial sector and help drive advancements in the industry.

These include air treatment and filtration equipment, pneumatics, control valves, hydraulic motors, drives and related components designed specifically for industrial applications.

#### **Fluid Power Automation (FPA) – ParkerStore Richards Bay**

HALL 1 Stand E19

*(Caption: (Left) Russel Jackson, Manager and (Right) Dean Trent, founder of Fluid Power Automation)*

Celebrating a decade of sharing their knowledge and service expertise in the hydraulic, pneumatic industry in the Zululand area, Dean Trent and Marius Sevenster - founders of Fluid Power Automation (Pty) Ltd FPA are proud to be ISO 9001 accredited. ParkerStore Richards Bay is the 11th ParkerStore for South Africa. The ParkerStore retail channel provides customers with the products and support they need to stay productive, by serving the industries when and where it is most essential. ParkerStore defines industrial retail as an environment that allows for the immediate and direct sale of industrial products through an approved, service based platform. From the outset, Dean Trent and Marius Sevenster realized that superior service in the machine automation and integration sector had to be an essential component for their business to succeed.

Hall 1 Stand D14

*(Caption: (Left to right) Pierre Orffer, Project and Purecare Engineer, PRenol Girdharie, Pneumatic and Hydraulic Specialist, Pravesh Pivarilall, Area Manager & MD, Cerri Priest, Racor Filtration & Tony Ladeira, Hydraulic Fittings and Hose)*

Providing high quality filtration, separation and purification products. Compressed Air Driers & Filters is privately owned and has a BEE Level 1 Certificate. "Our company is in its 16th year of operation, since we were established in the year 2000. We have three branches with the Head Office being based in Pinetown, a branch in Edenvale, Gauteng, and a branch in Port Elizabeth. Compressed Air Driers & Filters is a distributor for the domnick hunter range of compressed air dryers and filtration products. We have a factory trained service department to maintain and supply equipment on a National basis," says Pravesh Pivarilall, MD and owner of CADF.

CADF is also a ParkerStore and independent distributor for the Parker Hannifin range of products, dryers, filtration, fuel filtration, pneumatics, fittings, instrumentation and a vast range of other products. There are three major forms of contamination in compressed air lines, namely water, oil and dirt. In an average compressed air line of 15 cubic meters per minute at 7 bar pressure, you could expect to find 20 000 liters of water and 40 liters of oil passing through the system per year, as well as 896 million dirt particles per cubic meter, all of which contributes to the water and destruction of pipelines, pneumatic tools, downstream equipment and processes which can ultimately bring production to an expensive standstill. As part of the compressed air purification process, filtration and separation devices are installed in the compressed air stream to remove all contamination. The oily water condensate must then be removed from the downstream filters, driers and air receivers, for legal dispersal. CADF have the expertise, with over 25 years' experience in compressed air stream, to provide you with the most cost effective and reliable compressed air stream processing systems and equipment with the lowest operating differential pressure/energy losses.

Hall 1 Stand D01

*Caption: (Left) Ruan Scott, Branch Manager, ATI Systems & (Right) Ferdie Kuilder, Sales Manager, EP Normand & ATI Systems)*

EP Normand is the South African agent for Parker SSD Drives. We are well known in the industry as a leading supplier / integrator of variable speed drives (DC Drives) since 1974. We do repairs, installation and commissioning of SSD drives. We give advice and consulting. Panel building. Design & build of drive systems and we provide training. Some of our products include AC Drives, DC Drives, Linear Actuators, Soft Starters, Touchscreens to name a few.

EP Normand, the supplier of the following products in South Africa:

- AC Drives
- DC Drives
- Servo Drives
- Servo Motors
- Touchscreens
- Communications
- Resistors
- Incremental Encoders
- Tachogenerators
- Power Supplies
- Soft Starters
- Gearboxes
- Linear Actuators
- DC Motors
- AC Motors
- Grid-tie
