

Rocla, part of the IS Group of companies, has appointed Servaas Le Roux as its Technical Executive.

Le Roux who has been with Rocla for over eight years in his capacity as a civil engineer was previously responsible for the negotiation, development, design and project management of bespoke projects at Rocla as well the management of existing designs and advising on manufacturing processes.

“I am pleased to be taking on this exciting yet challenging position as Rocla’s Technical Executive. I believe my technical experience, love for process development and my focus on technical excellence in order to meet specific customer requirements will stand me in good stead in my new role at Rocla” said Le Roux.

Rocla’s technical expertise has, over its 100 years of operation, produced some innovative solutions such as their large spun concrete pole for 132 kV distribution networks; lightweight precast poles purpose-built for fibre optic cables in various height specifications; concrete cabins for solar power plants; various bespoke culverts for mining applications and also its Thuthukisa Sanitation Initiative aimed at cost effective community upliftment.

Rocla is Southern Africa's leading manufacturer of pre-cast concrete products for infrastructure, including pipes, culverts, manholes, poles and various other related products. The IS Group of companies also includes Technicrete and Ocon Brick.
