## A-Gas South Africa to display its hottest new products at FRIGAIR 2018

*1 June 2018: A-Gas South Africa will display its Rapid Recovery solution, in addition to its new Braze-A-Gas products, at FRIGAIR 2018, Africa's largest heating, energy, ventilation, air conditioning and refrigeration exhibition.*

With A-Gas South Africa celebrating 25 years as a market leader in the supply and lifestyle management of refrigerant and service gases across various industries, FRIGAIR 2018 represents “the perfect platform to keep our existing and future clients up to date with regulations, refrigerant trends, and the current products and services that we provide,” Sales Manager **Michael Labacher** notes.

“A-Gas South Africa prides itself in going that extra mile in all aspects. This year we have ensured our stand echoes this. It is both welcoming and inviting to those attending. We have also used our stand to capture our vision for our new Rapid Recovery service, and the launch of our new Braze-A-Gas product,” Labacher reveals.

Rapid Recovery is a complete refrigerant-recovery solution with unmatched recovery speeds. “There are many other benefits this service offers to our clients, one of them being a refrigerant buy-back programme,” Labacher notes. A Rapid Recovery vehicle will be on display on the outdoors stand, with refrigerant experts on hand to discuss the technical aspects of the service.

The new Braze-A-Gas products to be unveiled at FRIGAIR 2018 are used for brazing copper tubes, as well as for welding and cutting. “Here we have ensured that the cylinders are easy to handle, with our standard cylinder valves allowing the use of standard regulators,” Labacher adds.

“Customer relations are the backbone of our company. With many of our clients relying heavily on our services and products to keep their businesses operational, we ensure we know our clients and their needs in detail. With this approach and ethos, we have succeeded in maintaining many lucrative long-term relationships with clients over the years,” Labacher points out.

“Due to A-Gas being the leading global distributor of refrigerants, we have access to various markets, and also understand the trends and uses of refrigerants. With this knowledge in hand, we believe we can assist the South African market on the best way forward.”

Visitors to the A-Gas South Africa stand can look forward to on-hand sales expertise on the full product range, a detailed road map of future refrigerant trends, and first-hand exposure to the newly-launched products and services. “We encourage visitors to come to our stand, and have a chat with our team about the many innovations we have brought to the industry,” Labacher urges.

“Our aim is to promote new refrigerant alternatives, products, and our refrigerant recovery service in order to assist the market and end users to be compliant with local legislation, which requires refrigerants to be recovered and not vented.” In addition to representation from all of its branches, **Werner Terblanche** (Sales), **Grant McGill** (Sales), and Labacher himself will all be at FRIGAIR 2018 to interact with visitors and field all queries.

Visit A-Gas South Africa at Hall 5, Stand B17 (indoors) and Stand 0524 (outdoors) at FRIGAIR 2018 at Gallagher Convention Centre, Midrand from 6 to 8 June. For more information go to <https://www.frigairexpo.co.za/>.
