

PRESS RELEASE

MiniTACTOR™ - P Series

GIGAVAC's new line of patented switching devices, MiniTACTOR™ series of power contactors are small, lightweight and cost effective.

Designed and manufactured in the USA the hermetically sealed GIGAVAC MiniTACTOR™ 's join GIGAVAC's line-up of other sealed switching products including High Voltage Relays and EPIC® sealed contactor. At less than four ounces (100 grams), the GIGAVAC P105 and P115 can easily be installed in any orientation on a panel in a matter of seconds. A sealed chamber for both contacts and coil assures clean switching in any environment.

Safe make and break power switching can be achieved at any voltage up to 1500Vdc. With bi-directional switching capability and current carry to 80A, the MiniTACTOR™ is the perfect choice for pre-charge, charge and solar applications. The UL Certified, P115 MiniTACTOR™ is the noted solution for compliance with solar energy requirements under NEC 690.11 and NEC 690.12.

Both MiniTACTOR™ models have performance specifications that you would expect in far more expensive contactors.

The new PNC 113 has normally closed contacts.
