

WSP named Advisor of the Year in African investor 2018 Awards

19 June 2018 – WSP in Africa, one of the largest multi-disciplinary engineering consultancies on the continent, was named Advisor of the Year in the Africa investor (Ai) 2018 African Infrastructure Investment Awards.

The Awards were presented during an awards dinner last night, as part of the Ai CEO Infrastructure Project Developers Summit that took place yesterday at the St Regis Hotel, Le Mournie in Mauritius. WSP was one of ten consulting companies and finance/deal advisors shortlisted for the Advisory of the Year Award in April.

Mathieu du Plooy, Managing Director of WSP in Africa, said: “We are exceptionally proud of and honoured by this award, as it demonstrates a depth of our capabilities in facilitating meaningful infrastructure deals. This achievement would not have been possible without the continued hard-work and dedication of our team of experts, and community partners – and I would like to thank each of them, as they play a critical role in our cooperative success.”

About the Ai African Infrastructure Investment Awards

Ai is a leading international investment and communications group that, by way of the Ai African Infrastructure Investment Awards, provides a platform to recognise the work and achievements by infrastructure investor, project developers, financiers, operators and governments across the main infrastructure sectors in Africa. The Awards reward the institutions and personalities driving transactions and improving the continent’s infrastructure investment climate – where the 2018 awards celebrated and showcased public and private sector project investment innovations and the growing international competitiveness of African infrastructure as an investible asset class.

About WSP

WSP is one of the world's leading engineering professional services consulting firms. We bring together more than 42,000 talented people, based in more than 550 offices, across the world. We are technical experts who design comprehensive and sustainable solutions and engineer projects that will help societies grow for lifetimes to come. www.wsp.com
