Watergen celebrates World Water Day by making fresh, drinkable water out of thin air

Hey ,

It's 2019 and yet **780 million people still don't have access to water sources**,
and **2.5 billion people still live without safe water**, struggling to survive everyday.

As World Water Day is quickly approaching, I'm excited to introduce you to the future
of H_2O: [Watergen](), the global leader in water-from-air solutions. Watergen is on a mission to create
clean, drinkable water using the air around you to improve the quality of life of billions of people
across the globe who face poor water sanitation or inaccessibility to clean drinking water.
Winner of the "Best Tech and Innovation Award" at CES 2019 for its new at-home and office
product, Genny produces 25L of clean, drinkable water on tap simply using the air around you. With
Genny, Watergen's aims to leave no one behind by providing easy access to fresh clean drinking
water for countries in need.
