

PRESS RELEASE

Bobcat cleans up with versatile range of sweeping attachments

28 August 2019: The versatile range of sweeping attachments from Bobcat Equipment South Africa is ideal to sweep, collect, and dump any dirt and debris lying around before or after a job. From roadways and driveways to docks sidings and warehouses, these sweepers can even break up most hardened mud or other rough material with a handy built-in reversible cutting edge.

“These are by far the most versatile sweeping attachments on the market today,” Bobcat Equipment South Africa National Sales Manager **Brian Rachman** comments. Genuine Bobcat sweeping attachments feature strong and highly durable poly bristles. These are attached to a handy sweeper collector bucket that makes for easy disposal of collected material, based on a heavy-duty hydraulic motor.

The innovative design of Bobcat’s sweeping attachment removes the need to install multiple attachments, allowing for an efficient and holistic solution, together with the peace-of-mind offered by the one-year warranty. In addition, Bobcat’s customer service is guaranteed, with experienced service staff capable of dealing with assembly and repairs.

“Now you can sweep, collect, and dump dirt and other debris with just one attachment. Ideal for construction, industrial or municipal jobs, the hydraulically-driven Bobcat sweeper is easy to attach and simple to operate in either forward or reverse,” Rachman explains.

The sweeper attachment is perfect for cleaning parking lots, sidewalks, docks, warehouses, and more. The floating bristle head follows surface contours independent of the bucket, providing improved surface contact on slopes for improved sweeping consistency. The floating head also offers ideal down pressure for longer bristle life, reducing the number of required bristle adjustments.

In addition, hard-to-reach areas such as curbs, drainage depressions, and alongside buildings can be cleaned with the optional gutter brush attachment. This widens the sweeper’s total width, allowing for more area coverage per pass. The large metal bristles produce excellent cleaning action. When not in use, the gutter brush can be raised and stored vertically.
