

PRESS RELEASE

Inclledon launches latest Tekflo universal couplings

10 March 2020: Inclledon, a leading provider of quality fluid conveyance products and solutions, recently launched a new range of universal couplings, adding to its current range of Tekflo-branded products based on quality, value, and performance.

The Tekflo universal coupling range has been designed and developed to join various pipe materials with various outside diameters within a pipeline. Featuring a corrosion-resistant 300 µ fusion-bonded epoxy-coated body as standard, the outside diameter range caters for various pipe materials to be joined within the specified ranges.

Sizes are available from 50 mm DN to 350 mm DN. Ductile iron sleeves and end rings, EPDM gaskets, galvanised carbon steel bolts, and nuts and washers allow the couplings to operate at a nominal pressure of 1.6 MPa in water conveyance.

Inclledon distributes products utilised in the conveyance of water, gases and liquids. It has the largest and widest consolidated quality product offering in order to service the diverse industries it operates in, and is well-positioned to take advantage of the government's infrastructure development programmes.

Today Inclledon has branches in every major South African city, with a formidable national footprint, including Bloemfontein, Upington, Cape Town, Durban, East London, George, Johannesburg, Mbombela, Polokwane, Port Elizabeth, Secunda, and Rustenburg in order to ensure that customer service remains the top priority.
