

FROM IMPROVING EQUIPMENT RELIABILITY TO UNEARTHING THE RICHES OF TOMORROW

Shell Lubricants believes that there is potential for lubrication to deliver significant business value by contributing to improved productivity and reduced costs. Whether your mining operations involve underground or open-pit drilling, earthmoving, digging or crushing, your business relies on your equipment and their lubricated components. We appreciate the need to keep your excavators, haul trucks and mills working efficiently, which means getting the most out of your engines, hydraulic systems, transmissions and greased components.

Equipment breakdowns can severely compromise your mining operations and prevent your company from earning revenue. At Shell, we appreciate that in the mining industry, you are constantly striving to meet deadlines and lower operating costs. You have the perfect opportunity to choose from Shell's portfolio of world-class oils and greases. These have a proven track record of helping businesses like yours to extend the life of critical equipment, improve reliability and increase efficiency. Our sales force and technical experts can work with you to deliver products and services that will meet your specific needs.

We aim to help you:

- Choose the right products.
- Achieve continuous improvement through equipment performance monitoring.
- Increase your productivity and reduce your costs.

Contact our experts and put your potential in motion.
